1. We note your disclosure that subsequent to the performance of your annual goodwill

impairment test, in May

2023 a triggering event was identified that indicated that the

carrying value of the

MUAS reporting unit exceeded its fair value and that you recorded a

\$156 million goodwill

impairment charge. We further note disclosure on page 59 under

the heading Impairment

of Goodwill, that you determined that it was more likely than not

that the fair value of

the other reporting units were more than their carrying values as of $% \left\{ 1\right\} =\left\{ 1\right$

the annual goodwill

impairment test date. If you determined that the estimated fair value $% \left(\frac{1}{2}\right) =\frac{1}{2}\left(\frac{1}{2}\right) =\frac{1}{$

substantially exceeds

the carrying value for each of your reporting units, please disclose

this determination. To

the extent that the estimated fair value for any of your reporting

addition, consider providing a paragraph discussion of the reasons for the changes in

profitability of each reporting segment.
