need to have eyes on a target, or eyes on a convoy to make sure everything is safe, it's good to send out the Raven instead of risking someone getting hurt or killed."

AeroVironment's Raven is a fully man-portable, hand-launched small unmanned aircraft system designed for land-based operations. First adopted by the U.S. Army in 2005, Raven is now used by more than 25 countries across the globe. Weighing just over four pounds, with a wingspan of 4.5 feet and with a flying range of 10 kilometers, it is the most prolific small unmanned aircraft system deployed across the U.S. Department of Defense. The Raven system provides operators with real-time intelligence, surveillance and reconnaissance, delivering color or infrared video and still imagery to its operator via a hand-held ground control unit and to remote viewing stations, and uses a GPS system for pre-programmed or manual navigation.

About AeroVironment Small UAS

The [RQ-11B Raven®](https://www.businesswire.com/news/home/20190819005153/en/), [RQ-12A Wasp®](https://www.businesswire.com/news/home/20190819005153/en/) and [RQ-20A/B Puma™](https://www.businesswire.com/news/home/20190819005153/en/) comprise AeroVironment's Family of Small Unmanned Aircraft Systems. Operating with a common ground control system (GCS), this Family of Systems provides increased capability to the warfighter that can give ground commanders the option of selecting the appropriate aircraft based on the type of mission to be performed. This increased capability has the potential to provide significant force protection and force multiplication benefits to small tactical units and security personnel. AeroVironment provides logistics services

The SFAB are specialized units with the core mission to conduct training, advising, assisting, enabling and accompanying operations with allied and partner nations.

"Raven is the most widely deployed small unmanned aircraft system in the United States Department of Defense's fleet," said Rick Pedigo, vice president, sales and business development for AeroVironment. "Our family of small unmanned aircraft systems supports all U.S. military services and more than 45 allied nations. Every day, AeroVironment small UAS provide the actionable intelligence our customers need to proceed with certainty."

In a [report](https://www.businesswire.com/news/home/20190819005153/en/) published by the United States Army on July 24, 2019, Sgt. Jordan Aguiar, a cavalry scout assigned to Alpha Troop of the 2nd Squadron, 101st Cavalry Regiment, said the Raven is more agile and less detectable than larger and more costly unmanned aircraft. Soldiers use it to conduct battlefield reconnaissance and provide their units with a greater level of security. Sgt. Foluke Marsh added, "If you

worldwide to ensure a consistently high level of operational readiness. AeroVironment has delivered thousands of new and replacement small unmanned air vehicles to customers within the United States and to more than 45 allied governments.

About AeroVironment, Inc.
