

AeroVironment Introduces Switchblade 300 Block 20 Rapidly Deployable Loitering Missile System

March 28, 2023 1:10 PM EDT

Building on AeroVironment's tactical missile legacy, the Switchblade 300 Block 20 offers enhanced operational features and performance

ARLINGTON, Va.--(BUSINESS WIRE)--Mar. 28, 2023-- [AeroVironment](#) (NASDAQ: AVAV) today unveiled the newest version of its [Switchblade@ 300](#) rapidly deployable loitering missile system. The Switchblade 300 Block 20 builds on Block 10C's battle-proven performance with new operational features and significant performance and capability improvements.

Switchblade 300 Block 20 is portable, lightweight, and easy to operate, requiring only a single operator. The new tablet-based Fire Control System allows operators to easily train, plan, and execute missions. Operation of the system is further simplified by offering an integrated control directly onto the launcher tube.

"Since pioneering the loitering missile category with Switchblade 300 more than a decade ago, our tactical missile systems have proven to be a game-changing capability for both U.S. and allied forces, providing a remarkably rapid, precise and effective way to address lethal threats," said Brett Hush, AeroVironment's vice president and product line general manager of tactical missile systems. "Switchblade 300 Block 20 will continue to build on the system's battle-proven legacy."

Weighing just under five pounds, this lightweight, precision-guided lethal missile can be deployed in less than two minutes via tube-launch from land, sea, or mobile platforms, providing greater mission flexibility. The Switchblade 300 Block 20 features a longer endurance, improved Digital Data Link (DDL) range, new EO/IR panning camera suite, and left-hand commit with continuous positive identification (PID). Like its predecessor, Switchblade 300 Block 20 maintains its patented wave-off capability, enabling the operator to recommit against moving targets in highly dynamic environments.

The Switchblade 300 Block 20 provides small expeditionary units with stand-alone precision and lethal effects with minimal collateral effects. Delivering 20-plus minutes of tactical reconnaissance, surveillance, and target acquisition, the Switchblade 300 Block 20 provides real-time video for use against beyond-line-of-sight (BLOS) targets. Cursor-on-Target GPS coordinates provide situational awareness, information collection, targeting and feature/object recognition, that together will deliver the actionable intelligence and precision firepower needed to achieve mission success across multiple domains.

ABOUT AEROVIRONMENT, INC.

AeroVironment (NASDAQ: AVAV) provides technology solutions at the intersection of robotics, sensors, software analytics and connectivity that deliver more actionable intelligence so you can proceed with certainty. Headquartered in Virginia, AeroVironment is a global leader in intelligent, multi-domain robotic systems and serves defense, government and commercial customers.
